ARISE

The landscape of education is constantly evolving, and the role of school Principals has never been more critical. Principals & Academic leaders in India face multiple challenges in their day to day working life apart from being a good educator.

The ARISE Principal Forum recognizes that in today's interconnected world, access to unparalleled opportunities for professional development and networking with like-minded leaders from India and around the globe is key to add value to leaders of academia, on whose shoulders lies the most important task of nurturing the school student's journey through formative to secondary years and preparing them for setting their foot into the world of higher education.

Recognizing the need for continuous professional development, collaboration, and support among educational leaders, the ARISE Principal Forum program is designed to empower Principals & Academic leaders to find solutions for the challenges they encounter in their schools' day to day operations and administration.
